This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

SINKING FUND ASSETS.

United States Government bonds, 4 per cent.,	20,000 00	
Premium and commission paid on $20,000 United States bonds,	6,000 00	
Allegheny Valley Railroad bonds,	200,000 00	
Cash in banks,	2,399,298 88	
		2,625,298 88
Net debt December 1, 1907,		$102,318 14

The receipts from all sources during the year have exceeded our estimates by $3,250,000, and are $624,317 greater than the receipts last year.

The total expenditures from the Generol Fund were $1,139,000 less than last year, and the balance in the General Fund is $1,660,888.80 greater.

The cash in the Sinking Fund shows a decrease of $215,221.86, due to the transactions involving the sale of Government bonds amounting to $600,000, and the purchase of State bonds amounting to $918,550. These transactions resulted in a material saving to the State and gave relief to the banks during the financial stringency of October and November.

The bonded debt of the State is materially decreased; although the net debt shows an increase of $24,271.86, due to premiums paid on bonds purchased. This will be many times covered by the saving of interest on the bonds purchased.

In the matter of the expenditures in finishing and furnishing the new capitol, referred to in my last report, I wish to say that although denied the support of the Legislature, I refused, on my own responsibility, to pay warrants amounting to over $200,000.00 which were approved by the Governor and issued by the Auditor General. Other bills amounting to many thousands of dollars have not been presented on account of these refusals, and these amounts will doubtless be saved to the State.

In view of the charges of fraud that were made by this Department, the Legislature appointed an investigating commission, and after an exhaustive examination the Commission found that my estimate of $5,000,000 of overcharge was entirely within the facts.

The Commission recommended prosecutions, which were instituted and vigourously pressed by Attorney General Todd. Indictments have been secured against all the participants whose cases were not exempted by the statute of limitations.

The State is to be congratulated not only upon the exposure of one of the most stupendous frauds that was ever perpetrated, and the high probability of the conviction of the guilty parties, but also upon the general effect the reforms in the Treasury Department has had upon the other Departments and the general business of the State.

The certainty of careful examination of settlements and payments has led to increased receipts, and reduced payments amounting to many thousands of dollars.

The increased appropriations made by the last Legislature will in all probability absorb the current receipts in 1908. A table giving the estimated receipts for 1908 is appended, showing, a total of $23,543,700.00.

On October 3d, 1907 the balance due the Commonwealth from the City Savings Fund & Trust Company of Lancaster, which failed in 1904, was paid into the Treasury, closing the account.

In October, 1907, the Iron City Trust Company of Pittsburg closed

its doors, having at the time $75,000 of State funds on deposit, which sum with accrued interest was turned into the State Treasury by the sureties within five days after the failure.

Respectfully submitted,

WM. H. BERRY,
State Treasurer.
